## MI-300

### Features

- LED indicators for right response, left response, and power on.
- Calibration at 70 dB hearing level at 1 kHz.
- Both normally open and normally closed response relay configuration.
- Automatic power off when not in use.
- Designed for wall mount or table top use.
- Works with manual or automatic microprocessor audiometers.

### The MI-300

The MI-300 Calibration Monitor performs a quick and efficient daily biological calibration check of your audiometer, as required by OSHA. Its lightweight and durable construction will insure years of trouble-free operation.
