Optec 5000

**Patented Controlled Lighting
for the most accurate color
vision testing available**

Features Include:

- Instruments are manually controlled and color corrected
- Require 2 square ft. of space, is lightweight and portable and weighs less than 15 lbs. Scratch resistant, and has a washable surface made of ABS plastic
- Standard test packages designed for multiple areas including occupational medicine, school, athletics, F.A.A., drivers licensing, public health, primary care, D.O.T., Driver rehabilitation, and contrast sensitivity (optional).
- Select from our standard slide packages or customize a slide package for up to 12 slides, from over 150 testing slides
- All test slides are produced on high quality photographic film sealed between 2 glass plates. This ensures that the high quality images will last for years.
- Distance/Near Lens Systems
2 separate viewing ports for accurate distance (20 ft) & near (18") testing. Intermediate testing also available from 20" to 40"
- Intermediate Lenses available in 39.5, 31.5, 26.0, 22.5, & 20"
