Pocket Hearo LE

Key features:

- **Quick screening and threshold testing**
- **Simple and elegant handheld operation**
- **Wireless printing option**
- **Data capture and record management**
- **Self-contained-- no PC required**
- **Low cost (prices start at \$895 complete)**

The Pocket Hearo LE provides complete screening, threshold testing, printing and data management, all in a simple handheld device. The product is designed to establish a new standard for low-cost, easy to use screening audiometers, designed specifically for physicians, hearing and speech professionals, schools, and mobile/occupational health testing markets.

While the Pocket Hearo was designed for easy and convenient use, it is also a powerful tool, enabling you to quickly perform an accurate hearing test, and print and archive the results for comparison over time. Just plug the supplied headphones into your Pocket Hearo, and you're ready to go.

The Pocket Hearo is significantly faster and more efficient than other screening audiometers. A full threshold test can be completed in just a few minutes.
