CCA-100e

Audiometer Operation

The CCA-100e provides the ultimate in testing ease-push "Start" and the CCA-100e takes control. The intuitive user interface for Windows gives you control of one or two audiometers from your PC.

- Delivers automatic instructions though headset in twelve languages.
- Detects a wide variety of errors for dependable results
- Graphical audiogram updates while testing
- Reliable audiograms in 3-6 minutes
- Mark For Retest reduces manual testing
- Full manual control

Improve your productivity with total testing control from your computer. Intelligent testing procedures yield reliable results. Data always resides in the computer for increased efficiency.

The CCA-100e can store subject data and audiograms, or integrate seamlessly with leading hearing conservation database software.

User-friendly features like Plug and Play, on-line help, and automatic operation make the CCA-100e the best choice for industrial hearing conservation testing.

- Fast, reliable audiograms.
- Use with included data storage, or choose powerful Plus Package option.
- Full-page reports with demographic data and calculations on standard paper.
- Easy, economical OSHA compliance.
- Operates with leading hearing conservation databases.
- One-year warranty.
- Test and Error instructions delivered through headset in twelve languages

Subject Data Collection

The CCA-100e includes subject data storage and produces a full-page report on your computer's printer that is easier to read, handle, and store than strip prints.

- 300-audiogram memory
- Use of computer keyboard eliminates frustration of entering data on membrane keypads.
- Multi-tasking software allows testing data entry, and printing all at once.
-

OSHA Compliance

The CCA-100e is designed with OSHA regulations in mind to make your job easier.

- Collects all demographic data required by OSHA
- Integrates with available BAS-200 simulator for required daily calibration checks, or BAS-200 *slm* sound level meter for ambient noise level monitoring.
- Exceeds ANSI S3.6-1989 standards for audiometers.

Reports

The CCA-100e quickly produces full-page reports that are easier to read, handle, and store than strip prints.

- *Subjects Averages and Impairments*— all tests, including averages, PBI and STS calculations for the current test
- *Subject Test*—current test with average calculations
- *Subject Test STS*— current and baseline test with average and STS calculations
- *Subject Summary*—all tests, including STS analysis, averages and audiogram graph for the current test
- *Company Roster*— subject demographic and test data

“Plus” Database Management

The Plus Package removes the limit on number of subjects and tests in storage, adds additional reporting power and allows you to store an unlimited number of companies. You can manage hearing conservation programs using the Plus Package. Report samples are available on request.

- *Subject Notification Letter*—letter notifying subject of the STS and medical referral results in 12 languages
- *Company STS List*— list of subjects whose current test shows an STS
- *Company Recordable/Reportable Shift List*— list of subjects whose current test shows an OSHA recordable or MSHA reportable shift
- *Company Summary*— calculates and graphs number and percentage of subjects with hearing loss and whose current test shows an STS or recordable shift
- *Company test Schedule List*— list of subjects with no test in a range of dates or since a given date
- *Company Medical Referral List*— list of subjects with a medical referral as defined by AAO-HNS 1996
- *Subject History*— subject's current history responses
- *Subject History Questionnaire*— questionnaire to be filled out by subject
- *Company Exception List*— list of subjects with missing or invalid data to ensure report validity
- *Company Retest List* —list of subjects to retest
- *Company Recordable Shift Line Out List*— list of subjects who may have lined-out recordable shifts
- *Company STS Exception List*— list of subjects whose current test shows a non-persistent or repealed STS
- *All Company List*—lists company addresses and options

The following features are included with the Plus Package:

- Unlimited Number of companies
- Automatic baseline revision (NHCA 2000)
- Customizable notification letters in twelve languages
- Customizable medical history questionnaire
- Back-up and Restore feature conveniently saves you data to disk
- Extensive user-defined data and comment fields allow you to store any data you wish
- Look-up lists and field defaults reduce typing
- Data validation helps ensure accurate data entry
- Programmable import/export routines
